STAYING ON TRACK...STAYING AHEAD

Manco Rail Rail-Track Trolleys RT2000

Manco Rail Rail-Track Trolleys are designed to carry a pair of rail tracks up to 100m long in a train-like configuration

Designed to be towed by the Manco SH1200 Straddle Carrier, or other suitable towing unit

Each trolley has a 300mm x 2000kg lift capacity and are installed with special purpose rail clamps for lifting the rail track

Trolleys run on urethane rubber wheels and are complete with guidance wheels to aid in positioning

All trolleys have independent 800mm lateral track placement abilities allowing broad, standard, and narrow gauge use

Lift/lower and lateral travel via electric or pneumatic hand tools with 1/2"-drive 1.25"-socket and reduction gearboxes

Trolleys clip together with a hook and slipper coupling to enable trolleys to be towed when not carrying rail track

Pneumatic fail-safe brakes available on lead unit in case of inadvertent decoupling from towing vehicle

Manual wind-on parking brakes on all units
